Additional information: This sandal has an unusual vamp. The sides of the vamp are formed from two sets (17 loops per set) of symmetrical side toe loops that are continuations of the weft. On either side of an open toe are two sets (3 loops per set) of symmetrical toe loops that are continuations of warp and weft elements (each loop cord has four individual elements Z twisted in pairs) and part of the vamp. The vamp loops are brought together with an added cord that passes through all of these loops. The cord then passes through two side heel loops that extend from the top of the quarter. The cord is then brought across the top of the foot just in front of the ankle where it is tied to secure the sandal onto the foot.
